

UA-60T: AERA-vator™

Until now, the UA-60T: AERA-vator was only available in 3-pt tractor PTO. **Big News:** this unit is now available as a self-contained AERA-Vator powered by a 27 horsepower Honda engine – so no tractor is required. Tow it with any mid-size utility vehicle and easily maintain your school grounds, municipalities, sports complexes and use for all of your landscaping needs!

1st Products UA-60T attributes include:

- Universal Shaft System [USS] can be integrated into the UA-60T for added versatility.
- Meets DOT regulations for highway use and easily converts for travel.
- Perfect for ball field and golf construction, renovation and infield grooming.

Industry Uses: sports fields and grounds, golf, landscaping needs.
